IOT6000U Assessment Brief – 001 Presentation

Module Code	**IOT6000U**
Module Title	Digital Innovation and Product Development
Module Organiser(s)	Jonathan Jackson & Alim Gias
Assessment	001 Presentation
Weighting (%)	20%
Deadline	Friday 5th November 2026, 23:59
Duration / Length	10 minutes (video)

Assessment Outline

For this assessment, you will prepare and record a 10-minute video presentation or pitch which outlines a proposed digital solution based on an area of investigation with real-world significance that could be positively impacted by digital technology, and more specifically, some form of "AI" (defined broadly).

This is deliberately broad in scope to allow flexibility of choice and to allow you to align the work carried out on this module with your personal, professional, and educational goals as part of your final year of university studies and to develop AI literacy on terms that you are comfortable with personally.

Areas of investigation may include process automation, financial analysis, software engineering problems, societal issues, the environment, human rights, education, accessibility, diversity and inclusion, wellbeing, etc… and do not have to relate to your workplace context. You may frame your project in terms of a research question (e.g., "How can Neural Text-to-speech engines help with the learning of English as a second language?") or a project title (e.g., "An exploration of the potential to reduce environmental impact of LLMs by using on-device Small Language Models for workplace productivity.").

You are encouraged to align a proposed solution to your professional specialism (e.g., software engineering, data analysis, or business analysis) and any personal technical interests within your specialism. You may also align your project choice with your research being carried out as part of the IOT6002 module (if you are studying this in parallel) but you are not permitted to submit the same work for multiple assessments as this is self-plagiarism.

You are not limited to using a particular video production or presentation software, but your video should make use of appropriate visuals throughout, so MS PowerPoint slides (for example) would enable you to satisfy this requirement.

The following is a suggested structure for your presentation, designed to ensure you cover what is expected and to help set you up for success in the 002 final assessment. You may use as many individual slides as deemed necessary. Some specific KSBs have been included in brackets to highlight the relevance of particular assessment elements to your apprenticeship standard:

1. **Introduction** – ensure you include Student Name, Student ID, Module and Assessment details on the first slide.
2. **Area of investigation** – outline the selected area of investigation, summarise related evidence and resources, and demonstrate the real-world significance. **(S1)**
3. **Proposed AI Solution** – this should be some kind of software or data solution which incorporates "AI" in some constructive manner. **(S1, S3)**
    - The proposed solution must incorporate some form of "AI" or Machine Intelligence (defined broadly) which may include, but is not limited to, ML, NLP, Neural text-to-speech (NTTS), LLMs, etc… **(B7)**
    - Contrast your proposed solution with at least one other possible, alternative solution and justify your preferred approach in terms of competitive advantage **(K1, K2)** or increased likelihood of success.
    - Demonstrate a consideration of the technical viability of the solution proposed by including any draft prototype visuals, sample code, or other evidence of feasibility testing.
4. **Potential Obstacles** – these may include human, technical, contractual, or resourcing obstacles **(K3, S2).** Use appropriate proven frameworks to enhance the rigour and thoroughness of your analysis of potential internal and external obstacles (e.g., PESTEL for external factors).
5. **Business Case Outline** – this can be framed in a variety of ways including an independent venture (e.g., a startup or social enterprise) or as an internal organisation initiative. **(K4)**
    - Make the benefits of your proposal clear in a way that is appropriate to your intended audience **(B5)**, ensuring you demonstrate value, whether this is measured financially or otherwise.
    - Outline what resources and/or personnel would be required to fully realise the solution in the short- and long-term.
    - While you may wish to produce a fully formed business case document to support this section of your video, you do not need to show your full business case within the presentation.
6. **References** – Harvard or IEEE format recommended. Focus on quality over quantity. Utilise references particularly when they can strengthen your proposal and make it more persuasive. You can include the in-text citations on slides where they are most relevant and include a list of the full references at the end of your presentation which does not need to be on screen for more than a few seconds.

You are required to appear on camera in at least some of the video while talking. Failure to adhere to this requirement will result in a fail (0) for the assessment, unless written approval has been granted by your module organiser prior to the assessment deadline due to exceptional circumstances or reasonable adjustments.

Your video should be produced in a manner appropriate to a professional context, but creativity is encouraged to effectively communicate your proposal and engage your audience through visual elements that support your narration. A "talking head" video without any

supporting visual elements will not enable you to achieve the highest marks on this assessment.

Please consult with the module organiser if you are in doubt about the appropriateness of any tool or technique you wish to use.

Pseudonymise, anonymise, or redact any personally identifiable information (PII) included in your presentation, particularly if you are referring to any primary data you may have collected as part of any initial research (e.g., informal interviews).

The feedback you receive from this assessment should be used to help enhance your submission for the 002 assessment. This is known as ***feedforward***.

See the "Assessment Criteria" at the end of this document for more detail on how your work will be assessed.

Video Submission Instructions and Compliance

Log in to EchoVideo (Q-Review) using your QMUL email address and upload your video demonstration there first.

When you start your submission on QMPlus, there will be an online text box where you must embed the uploaded video using the media embedding tool above the text box. Guidance on how to upload your video to EchoVideo and embed it in the submission text box can be found here.

Important: Please do not delete your uploaded video from EchoVideo, even after receiving your marks and feedback.

Avoid waiting until the last minute to upload your video file to avoid risking mark deductions due to late submissions. PowerPoint files will not be accepted as an alternative to a video file.

If you are subject to employer compliance constraints and are unable to submit a pre-recorded video, please submit the compliance-approved slides (and transcript, if available) as a single PDF instead of your video and an opportunity to stream your video live will be arranged.

Late Submissions and Extenuating Circumstances

Assessments submitted after the published deadline will be marked as late and will receive a penalty, unless you have approved Extenuating Circumstances (EC).

Late penalties are applied automatically so please be aware that even submitting 10 seconds late (e.g. 23:59:10) will trigger a late penalty.

You may submit up to seven calendar days after the deadline but a penalty of 5% of the total marks available will be applied to the assessment for each 24-hour period (or part of it) that the work is late (e.g. five marks deducted each day from a total of 100). After seven calendar days the assessment will be recorded as a non-submission and given a mark of zero.

For more information, you can find the latest Assessment Handbook and Extenuating Circumstances policy via the QMUL policies page here: https://www.qmul.ac.uk/governance-and-legal-services/policy/policies-by-category/

Generative AI

AMBER 🟡 (AI permitted)

Use of Generative AI (e.g., MS Copilot or ChatGPT) is permitted for this assessment. If using spelling or grammar assistive tools, be cautious if using any Generative AI features which rewrite non-trivial portions of your work in case your original meaning is lost or your writing ends up being incoherent. You remain fully responsible for the work you submit.

Avoid relying on Generative AI to format your references as these tools can often produce references which do not exist which will significantly undermine the credibility of your work and may be considered academic misconduct. Dedicated reference management tools such as EndNote, Zotero or Mendeley can provide more reliable support for this task.

The following are examples of potential uses of GenAI that would be appropriate:

✔ **Developing or refining a project idea**	Using AI to explore possible project ideas or refine a research question, aims, or objectives. **Your responsibility**: You remain responsible for determining the final focus, framing, and direction of your work.
✔ **Creating diagrams, visuals or infographics**	Using AI to generate or refine visual representations based on your own content, analysis, or interpretation. **Your responsibility**: You remain responsible for the accuracy, meaning, and interpretation of any visual material submitted and should not present AI-generated data, results, or analysis as your own.
✔ **Planning or improving the structure of your work**	Using AI to suggest possible improvements to the clarity, flow and organisation of your presentation. **Your responsibility**: You remain responsible for determining how your work is organised and structured and how it addresses the learning outcomes and assessment marking criteria.
✔ **Checking and/or improving spelling, grammar and punctuation**	Using AI as a proofreading or editing aid to identify spelling, grammar, punctuation, or typographical errors. **Your responsibility**: You remain responsible for ensuring that any suggested changes accurately reflect your intended meaning and do not introduce new content or ideas.
✔ **Improving clarity and readability**	Using AI to suggest clearer phrasing, improve expression, or enhance the readability of text in your slides. **Your responsibility**: You remain responsible for the meaning, argument, and interpretation presented in your work.

If you are in doubt about the appropriateness of using any specific assistive technology, please discuss with your module organiser.

For more guidance, please see https://www.qmul.ac.uk/library/academic-skills/student-guide-to-generative-ai/.

Knowledge, Skills, and Behaviours (Apprenticeship v1.2)

This assessment is designed to help you engage with the following core Knowledge, Skills, and Behaviours (KSBs) from your apprenticeship standard:

- **K1** – How organisations adapt and exploit digital technology solutions to gain a competitive advantage.
- **K2** – The principles of strategic decision making concerning the acquisition or development of digital and technology solutions. For example, business architecture approaches such as capability models and target operating models.
- **K3** – Principles of estimating the risks and opportunities of digital and technology solutions.
- **K4** – Techniques and approaches involved in creating a business case for new digital and technology solutions. For example, journey, product and capability mapping and value chains.
- **S1** – Analyse a business problem to identify the role of digital and technology solutions.
- **S2** – Identify risks, determine mitigation strategies and opportunities for improvement in a digital and technology solutions project.
- **S3** – Analyse a business problem in order to specify an appropriate digital and technology solution.
- **B5** – Interacts professionally with people from technical and non-technical backgrounds. Presents data and conclusions in an evidently truthful, concise and appropriate manner.
- **B7** – Maintains awareness of trends and innovations in the subject area, utilising academic literature, online sources, community interaction and conferences.

Queen Mary University of London

Assessment Criteria

	Fail		Pass				
	0-29 (F)	**30-39 (E)**	**40-49 (D)**	**50-59 (C)**	**60-69 (B)**	**70-79 (A)**	**80-100 (A+)**
	Not successful	**Below required standard**	**Pass**	**Satisfactory**	**Good**	**Excellent**	**Outstanding**
Minimum pass requirements	You must appear on camera in at least some of the video while talking, unless written approval has been granted by module organiser prior to the assessment deadline due to exceptional circumstances or reasonable adjustments. Submission must be a video. PowerPoint presentation files (.pptx) will not be accepted.						
Introduction and area of investigation (20%)	Introduction is missing or incoherent. Area of investigation poorly justified, inappropriate, or missing.	Introduction is present but lacking clarity. Area of investigation may be appropriate but not justified.	Introduction outlines project context in a basic manner but lacks some clarity. Area of investigation has some real-world relevance.	Introduction outlines project context in a mostly clear manner. Area of investigation has some real-world relevance and is adequately justified.	Introduction outlines context in a consistent and clear manner. Area of investigation has strong real-world relevance and is clearly justified.	Introduction is insightful and outlines project context in a highly consistent and clear manner. Area of investigation has strong real-world relevance and is clearly justified, **underpinned by appropriate sources**.	**In addition to A-grade criteria:** Demonstrates a mature appreciation of a real-world issue, **well beyond what has been taught.**
Proposed AI Solution (20%)	Proposed solution is inappropriate or missing entirely.	Proposed solution is lacking clarity, has significant omissions, or is inappropriate.	Proposed solution is appropriate but lacks clarity and has omissions. Appropriate visuals, screenshots, and/or code examples are missing. There is an attempt to include appropriate AI technology.	Proposed solution is predominantly clear with some degree of appropriate justification. **At least one** appropriate visual, screenshot, or code example is included to demonstrate aspects of the solution. Some consideration of the solution's technical viability. Proposed application of AI is appropriate and well explained.	Proposed solution is predominantly clear with appropriate justifications, including an effective comparison with at least one other solution. **Some appropriate** visuals, screenshots, and/or code examples are included to demonstrate aspects of the solution. The solution's technical viability is explained with some supporting evidence. Proposed application of AI is appropriate, well explained, with some justification.	Proposed solution is **very clear** with well-considered justifications, including an effective comparison with at least one other solution and a **clear articulation of how the proposed solution can deliver competitive advantage.** **High-quality** visuals, screenshots, and/or code examples are **of a professional standard**. Clear and comprehensive consideration of the solution's technical viability with detailed evidence. Proposed application of AI is appropriate, well explained, and fully justified.	**In addition to A-grade criteria:** Proposed solution is of outstanding quality and shows evidence of being research-informed to a standard **well beyond what has been taught.**

Queen Mary University of London

Assessment Criteria

	Fail		Pass				
	0-29 (F)	**30-39 (E)**	**40-49 (D)**	**50-59 (C)**	**60-69 (B)**	**70-79 (A)**	**80-100 (A+)**
Potential Obstacles (20%)	Potential obstacles are incoherent or missing.	Potential obstacles are lacking significant clarity or detail.	An outline of potential obstacles is attempted but with omissions, lacking depth, and may include some irrelevant obstacles.	Potential obstacles outlined in some depth, with some omissions.	Potential obstacles outlined in depth, with **some evidence of a systematic analysis** to ensure as many obstacles have been identified as possible.	Potential obstacles (**both internal and external**) outlined in depth, with clear evidence of a systematic analysis **based on at least one proven framework** appropriate to the context.	**In addition to A-grade criteria:** An **exhaustive** analysis of potential obstacles based on at least one proven framework appropriate to the context with **full justification of the chosen framework**, appropriately referenced.
Business Case Outline (20%)	Business case outline is either incoherent or missing.	Business case outline is present but very limited and with significant omissions.	Business case outline is present but **may lack detail**. The business case **adequately** covers **at least one** of the following aspects: • Justified type of initiative • Benefits and value to be delivered • Resources required	Business case outline is of a **satisfactory** standard. The business case **adequately** covers **at least two** of the following aspects: • Justified type of initiative • Benefits and value to be delivered • Resources required	Business case outline is **high quality**, with **limited or no omissions**. The business case **adequately** covers **all** of the following aspects: • Justified type of initiative • Benefits and value to be delivered • Resources required	Business case outline is **very high quality**, with **no apparent omissions or ambiguity**. The business case covers **all** of the following aspects to a **very high standard**: • Justified type of initiative • Benefits and value to be delivered • Resources required	**In addition to A-grade criteria:** Demonstrates **outstanding quality** of work, including elements within the business case **well beyond what has been taught,** and potentially suited for real-world investment.

Queen Mary University of London

Assessment Criteria

	Fail		Pass				
	0-29 (F)	**30-39 (E)**	**40-49 (D)**	**50-59 (C)**	**60-69 (B)**	**70-79 (A)**	**80-100 (A+)**
Communication Skills (20%) • Clear speech and articulation • Language appropriate to purpose and audience • Use of appropriate video production and presentation techniques • Appropriately timed	Presentation demonstrates **limited or no** ability to communicate verbally or use appropriate video recording tool(s)	Presentation demonstrates an **insufficient** ability to communicate verbally. Significant amount of speech and articulation lacking clarity.	Presentation demonstrates **some** ability to communicate verbally with some limitations, evidenced by: • Some speech and articulation lacking clarity. • **Basic** use of video recording tool(s) and presentation techniques. • **Poor timing**	Presentation demonstrates **sufficient** ability to communicate verbally, evidenced by: • Clear speech and articulation throughout **most** of the presentation. • **Mostly appropriate** use of video recording tool(s) and presentation techniques. • **Timing** within **+/-20%** of the specified time limit.	Presentation demonstrates a **proficient** ability to communicate verbally, evidenced by: • Clear speech and articulation throughout of the presentation. • **Appropriate** language and professionalism. • **Appropriate** use of video recording tool(s) and presentation techniques. • **Timing** within **+/-10%** of the specified time limit.	Presentation demonstrates a **highly accomplished** ability to communicate verbally, evidenced by: • **Clear and confident** speech • Accurate articulation. • Entirely appropriate language and professionalism. • Excellent use of video recording tool(s) and presentation techniques. • **Appropriately timed** within **+/-10%** of the specified time limit.	Presentation demonstrates an **exceptional** ability to communicate verbally, evidenced by: • **Exceptionally clear and confident** speech. • Flawless articulation. • Entirely appropriate language and professionalism. • Exceptionally creative use of video recording tool(s) and presentation techniques, of a standard appropriate to be shared as **exemplar** work. • **Appropriately timed** within **+/-5%** of the specified time limit.
